3 Courses

Cloud Computing Law: Transactions

Cloud Computing Law: Data Protection and Cybersecurity

Cloud Computing Law: Law Enforcement, Competition, & Tax

Aug 7, 2026

Ali Moghadam

has successfully completed the online Specialization

Cloud Computing Law

In this Specialisation, learners developed an understanding of the legal and regulatory implications of using and providing cloud computing services. The Specialisation consists of three courses and covers a range of relevant legal areas, including cloud contracts, data protection law, and law enforcement access. To apply their knowledge, learners analysed case studies and answered a series of multiple-choice questions which tested the ability to describe cloud providers' and customers' legal rights, to identify and assess relevant legal risks, and to suggest possible legal and technological solutions.

Professors Christopher Millard, Ian Walden, and Chris Reed

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
